Sonic Alert SB1000ss Sonic Boom Loud Vibrating Alarm Clock with Built In Receiver by Sonic Alert Review

The [Sonic Alert SB1000ss Sonic Boom Loud Vibrating Alarm Clock with Built In Receiver](#) is certainly not your run-of-the-mill, every day alarm clock. This is more of an alarm system that is built to help deep sleepers and people with hearing impairments.

With its very loud, 113 decibel alarm tones, this is an alarm that no deep sleeper will sleep through. Since this **loudest alarm clock** also features some other ingenious technology, it makes for a full-feature system that will help anyone stay alert and awake – no matter what time of day it is.

Bed Shaker Technology

Our favorite feature of the [Sonic Alert SB1000ss Sonic Boom Loud Vibrating Alarm Clock with Built In Receiver](#), has to be the powerful bed shaker. This little device can be easily attached to the Sonic Alert SB1000ss with the included wire.

Once it's attached, you simply place the bed shaker between your mattress and box-spring. What it does next will amaze you. When the alarm goes off, the bed shaker goes to work by... well shaking your mattress. This may sound very simplistic, but the results are quite amazing.

People who can sleep through even the loudest alarms have reported that the bed shaker wakes them up easily, every single day. You kind of have to experience this mattress vibration for yourself, but once you do, you'll probably agree that there's no sleeping through this kind of wake the dead alarm.

Sonic Boom Loudest Alarm Clock: Features & Product Details

- You can choose from multiple alarm tones to find the one you like best.
- The alarm tones can reach an amazingly high volume level of 113 decibels.
- The built in receiver can alert you to doorbell rings and telephone calls – works with particular signaler models (Models SA101, SA201, RH100, BL300, Sonic Boom Alarm Clock)
- Also features a built in 120 volt plug for lamps, so you can get a flashing light alert when the alarm sounds.
- Backed up by battery power, so the time stays current during power outages.

When you combine the flashing lights, the super loud alarm tones and the powerful bed shaker, you'll have an alarm system that you'll never sleep through again.

If you have a loved one with hearing impairments, the *Sonic Alert SB1000ss Alarm Clock with Built In Receiver* can provide a real means of independence that *regular alarm clocks* and signalers can't match.
